Veeva Automation Test Engineer Roadmap

A 3–4 Month Preparation Guide with Resources

What Veeva Expects

Veeva's test automation roles emphasize strong Java fundamentals, UI automation with Selenium (often with Cucumber/BDD), API automation, CI/CD tools, and problem-solving skills. They value candidates with knowledge of cloud technologies and the life sciences/healthcare domain.

Phase 1: Testing Fundamentals + Java Core (2–3 weeks)

Goals:

- Master SDLC, STLC, test design techniques, and defect lifecycle
- Build strong Java OOP, collections, exceptions, and file I/O skills

Key Resources:

- Software Testing Basics: Guru99 Testing
- Java for Testers: Udemy Java Course
- Agile Testing Book: O'Reilly Agile Testing

Phase 2: UI Automation with Selenium + TestNG + POM (4–6 weeks)

Goals:

- Master Selenium WebDriver with Java (locators, waits, alerts, frames)
- Build TestNG-based frameworks with Page Object Model
- Optional: Learn Cucumber for BDD

Key Resources:

- Selenium Official Docs: Selenium Documentation
- Selenium Java Examples: First Selenium Script
- TestNG Tutorial: Guru99 TestNG
- Framework Example: Selenium GitHub Examples

Phase 3: API Testing + REST Assured (2–3 weeks)

Goals:

- Understand REST APIs, HTTP methods, status codes, authentication
- Master Postman for manual API testing
- Automate APIs with REST Assured and integrate with TestNG

Key Resources:

- REST Assured Docs: REST Assured Documentation
- Postman Learning: Postman Learning Center
- Practice APIs: ReqRes API, Restful Booker

Phase 4: CI/CD, Git, Jenkins, and Cloud Basics (2–3 weeks)

Goals:

- Master Git/GitHub workflows (branching, PRs, merging)
- Set up Jenkins pipelines for automated test execution
- Learn Maven/Gradle for build management
- Understand AWS basics (EC2, S3, IAM, Load Balancers)

Key Resources:

- Git Tutorial: Atlassian Git Guide
- Jenkins Tutorial: Jenkins Documentation
- Maven Guide: Maven Documentation
- AWS Basics: AWS Training

Phase 5: Veeva-Specific Context + Interview Prep (2–3 weeks)

Focus Areas:

- Life sciences/pharma domain knowledge (GxP, audit trails, workflows)
- Veeva Vault platform architecture and testing strategies
- Multi-tenant SaaS testing challenges

Key Resources:

- Veeva Careers: Veeva Job Postings
- Interview Questions: Glassdoor Veeva Interviews
- Interview Guide: TechInterview Veeva Guide
- Veeva Vault Info: Veeva Vault Architecture

Project Ideas to Showcase

- Selenium + TestNG + POM framework for a demo e-commerce site
- REST Assured API automation framework with schema validation
- CI/CD pipeline with Jenkins running both UI and API tests
- GitHub repository with clear README and execution instructions
